$$x = a \lor x \ne a$$
  
 $f(a) \ne f(b)$   
 $R = \{x = a\}$  is grou

$$\bot = \bot \lor \bot \neq \bot$$
$$f(\bot) \neq f(a)$$

$$R = \{x = a\}$$
 is ground complete  $\sigma = \{x \mapsto b\}$   $(x = a)\sigma = a \rightarrow b$  with  $a > b$   $f(a) \neq b$ 

$$\begin{split} \mathsf{P}(\mathsf{a}), \neg \mathsf{P}(\mathsf{f}(\mathsf{a},\mathsf{b})), \mathsf{f}(x,\mathsf{b}) &= x \\ \mathsf{P}(\mathsf{a}), \neg \mathsf{P}(\mathsf{f}(\mathsf{a},\mathsf{b})), \mathsf{f}(\bot,\mathsf{b}) &= \bot \\ \{\mathsf{f}(x,\mathsf{b}) &= x\} \text{ is ground complete and with } \{x \mapsto \mathsf{a}\} \text{ we get } \neg \mathsf{P}(\mathsf{a}) \end{split}$$
